POWERPORT
PROMOTIONAL POWER BANK
THIS UNIT IS DESIGNED TO RECHARGE ENERGY HUNGRY MOBILE DEVICES ON THE GO!

COMPATIBLE WITH ALL MOBILE DEVICES

Product specification:
Capacity: 2,200mAh
Cable: 80cm micro-USB
Battery type: Lithium-ion
Input: 5V ≤ 1,000 mA
Output: 5V ≤ 1,000 mA

Instructions:
This PowerPort is for use with any device that supports USB charging.
Before first use, connect the micro-USB cable to the unit and then connect to a computer or USB power adaptor and fully charge. The unit's Red light will signal recharging and turns off once full. When your device's battery is low, plug the PowerPort into your device with your USB charging cable. The unit's Blue light will signal charging and turns off automatically once empty.

Precautions:
Keep the unit dry at all times and do not expose to excessive temperatures or pressure.
This unit contains a Lithium-Polymer battery. If disposing of your PowerPort, please recycle.
The unit will shut down if a short circuit occurs. To reset the PowerPort, plug in and recharge.
Whilst charging or recharging, the PowerPort may create heat, this is perfectly normal.
With some devices the unit's indicator light may pulse, this is a normal feature.
Use of this unit is at the user's own risk and we will not accept liability for any damage caused by the use of this product or its accessories.
